

ADVANCED CERTIFICATION PATH

Advanced SAFe® Practice Consultant

Build skills that facilitate sustained transformation with the Advanced SAFe® Practice Consultant (ASPC) certification path. This renewable certification supports experienced SPCs in developing sustainable transformation strategies, including educating leadership, excelling in Lean Portfolio Management (LPM) implementations, and cultivating a coaching culture that drives relentless improvement.

Throughout the learning path, participants will engage in blended learning that combines self-paced, facilitated, and peer-to-peer learning to progressively build and validate their skills. The certification path culminates with the Learning Lab, a half-day facilitated session that offers scenario-based assessments that cumulatively evaluate participants' mastery of key concepts. Learners are awarded the Advanced SPC certification upon completing all modules in the ASPC certification path.

Advanced SPC at-a-glance

Writing Effective OKRs

Executing a Successful Transformation Strategy

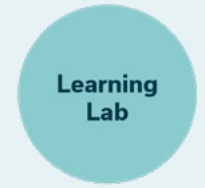

Excelling with LPM

Engaging Leaders

Pursuing Relentless Improvement

Scenario-based peer-to-peer learning

Advanced SPC certification path

4 SAFe Micro-credentials

Facilitated half-day sessions focusing on topics including educating and supporting leadership, and cultivating a culture of relentless improvement.

1 SAFe Skill

A one-hour self-paced e-learning on writing effective OKRs to drive alignment, prioritization, and accountability across teams.

Learning Lab

A small group session allowing learners to complete case-study-based scenarios to consolidate what they have learned through real-world application.

Advanced SAFe® Practice Consultant
