DevOps Workshops

In order to enable continuous delivery, the organization must align to value streams, then optimize the delivery process from Concept to Cash. Agile addresses the Concept to Code™ process. DevOps addresses Code to Cash™ process, which is enabled by the Deployment Pipeline. Icon's DevOps workshops lead the organization through a practical and engaging approach to kicking off a DevOps transformation the right way.

DevOps Discovery Workshop

This 1-day workshop examines the organization's current-state deployment pipeline and establishes baseline performance metrics. This achieves a fact-based understanding of delivery health and aligns the organization on the highest-value opportunities for improvement. Participants include a cross-section of senior Dev and Ops leaders and senior technical practitioners.

Objectives:

〈 Define Your Current State Deployment Pipeline

〈 Identify Major Pipeline Pain Points & Root Causes

〈 Identify High Value Opportunities for Improvement

〈 Develop Actionable Takeaways & Artifacts

Topics Covered:

〈 Setting the Context

〈 Mapping Your Deployment Pipeline

〈 Identify Constraints

〈 Brainstorming Solutions

DevOps Solution Workshop

This 1-day workshop builds the vision, strategy and teams that will guide and execute the DevOps transformation. This achieves organizational alignment on the target-state deployment pipeline and the road map that will chart the journey. Participants include a cross-section of senior Dev and Ops leaders and senior technical practitioners.

Objectives:

〈 Review DevOps concepts & Approach

〈 Define the DevOps Vision & Key Metrics

〈 Review DevOps Discovery Workshop Results

〈 Define a Target State Deployment Pipeline

〈 Identify and Prioritize DevOps Epics

〈 Staff the DevOps Transformation Team

Topics Covered:

〈 Setting the Context

〈 Mapping Your Deployment Pipeline

〈 Identify Constraints

〈 Brainstorming Solutions
